

1. HERO SECTION (AI POSITIONING)

Headline:

AI-Powered CNC Manufacturing for the Next Industrial Era

Subheading:

Nanya CNC combines precision engineering with intelligent automation to deliver faster production, higher accuracy, and smarter manufacturing solutions.

Supporting Line:

From single machines to fully integrated smart factories — we help you scale with confidence.

CTA Buttons:

- **Get Consultation** (Primary)
- **Explore Smart Machines** (Secondary)

Micro Text (below buttons):

- ✓ AI Optimization
- ✓ High Precision Output
- ✓ Global Industrial Standards

2. WHY NANYA CNC

Section Heading:

Why Nanya CNC Leads the Future of Manufacturing

Subtext:

We don't just manufacture machines — we build intelligent production systems designed for efficiency, scalability, and long-term growth.

CARD 1:

AI-Driven Precision

Advanced algorithms optimize cutting paths and reduce errors, ensuring unmatched accuracy in every operation.

CARD 2:

High-Speed Production

Maximize output with machines engineered for speed without compromising quality.

CARD 3:

Smart Automation

Reduce manual work with automated workflows, real-time monitoring, and intelligent controls.

CARD 4:

Global Reliability

Trusted by industries worldwide with durable machines and consistent performance.

3. SMART MACHINES

Section Heading:

Explore Our Smart CNC Machines

Subtext:

Designed for modern manufacturing, our machines deliver performance, precision, and intelligent control.

MACHINE 1:

CNC

4. INDUSTRIES

Section Heading:

Solutions for Every Industry

Subtext:

Our CNC systems are built to meet the unique demands of multiple industries.

CARDS OF ALL INDUSTRIES IN FUTRISTIC WAY

5. SMART FACTORY SYSTEM

Section Heading:

Building Smart Factories with Intelligent CNC Systems

Subtext:

Transform your production line into a fully connected, data-driven smart factory.

FEATURE 1:

Integrated Automation

Seamless machine-to-system communication for optimized workflows.

FEATURE 2:

Real-Time Monitoring

Track performance, efficiency, and output with live data insights.

FEATURE 3:

AI Optimization

Smart algorithms improve speed, reduce waste, and maximize productivity.

Closing Line:

From standalone machines to complete smart manufacturing ecosystems — we power the future of production.

6. STATS / DATA SECTION

Heading:

Proven Performance. Trusted Worldwide.

Stats:

- **5000+ Machines Delivered**
 - **30+ Countries Served**
 - **98% Precision Accuracy**
 - **16+ Years Industry Experience**
-

Supporting Line:

Delivering consistent performance and long-term reliability across global industries.

7. BLOGS / INSIGHTS

Heading:

FINAL TOUCH (VERY IMPORTANT)

Add one strong closing line:

“Nanya CNC — Powering the Future of Smart Manufacturing.”

ABOUT US PAGE

1. HERO SECTION (IDENTITY)

 **Heading:**

Engineering Intelligence into Every Machine

 **Subheading:**

At Nanya CNC, we combine advanced engineering with AI-driven innovation to redefine modern manufacturing.

 **Supporting Line:**

From precision machining to smart factory solutions — we are shaping the future of industrial production.

2. COMPANY INTRO (CORE STORY)

 **Heading:**

Who We Are

 **Content:**

Nanya CNC is a forward-thinking manufacturing company specializing in high-performance CNC machines and intelligent production systems.

We go beyond traditional machining by integrating automation, data-driven optimization, and cutting-edge technology into every solution we deliver.

Our goal is simple:

 Help businesses increase efficiency, reduce costs, and scale production with confidence.

3. OUR VISION

 **Heading:**

Our Vision

Content:

To become a global leader in AI-powered manufacturing by transforming industries through intelligent, efficient, and scalable CNC solutions.

4. OUR MISSION

 **Heading:**

Our Mission

Content:

- Deliver high-performance CNC machines with unmatched precision
 - Integrate smart technologies into modern production systems
 - Empower industries with automation and data-driven insights
 - Build long-term partnerships through quality and innovation
-

5. WHAT MAKES US DIFFERENT (IMPORTANT SECTION)

 **Heading:**

Why Choose Nanya CNC

POINT 1:

AI-Driven Innovation

We integrate intelligent systems that optimize performance, reduce waste, and improve production efficiency.

POINT 2:

Engineering Excellence

Every machine is designed with precision, durability, and long-term performance in mind.

POINT 3:

Customized Solutions

We understand that every business is unique — our solutions are tailored to your exact production needs.

POINT 4:

Global Standards

Our machines meet international quality benchmarks and are trusted across multiple industries worldwide.

6. OUR JOURNEY (TIMELINE)

Heading:

Our Journey

Structure (Timeline Style):

- **Year 1:** Foundation of Nanya CNC
- **Year 3:** Expansion into international markets
- **Year 5:** Launch of advanced CNC systems
- **Year 8+:** Transition into smart manufacturing solutions

 (You can adjust years based on real data)

● 7. OUR EXPERTISE

🔥 **Heading:**

Our Expertise

💡 **Content:**

We specialize in a wide range of CNC technologies and industrial solutions:

- CNC Router Machines
- Laser Cutting Systems
- Plasma Cutting Machines
- Custom CNC Solutions
- Smart Factory Integration

■ 8. GLOBAL PRESENCE

🔥 **Heading:**

Serving Industries Worldwide

💡 **Content:**

Nanya CNC proudly serves clients across multiple countries, delivering reliable solutions for diverse industries including furniture, automotive, metal fabrication, and advertising.

📊 **Optional Stats:**

- 30+ Countries Served
 - 5000+ Machines Installed
 - 10+ Years Experience
-

9. OUR APPROACH (SMART SYSTEM THINKING)

 **Heading:**

Our Approach to Smart Manufacturing

 **Content:**

We don't just sell machines — we build complete production ecosystems.

Our approach focuses on:

- Understanding your business needs
 - Designing optimized solutions
 - Integrating automation and AI
 - Ensuring long-term scalability
-

10. TRUST / QUALITY SECTION

 **Heading:**

Commitment to Quality & Reliability

 **Content:**

Every machine undergoes strict quality checks and performance testing to ensure durability, accuracy, and consistent output.

We are committed to delivering solutions that meet the highest standards of industrial excellence.

11. TEAM SECTION (OPTIONAL BUT STRONG)

 **Heading:**

Our Team

Content:

Our team consists of experienced engineers, designers, and industry experts dedicated to innovation and continuous improvement.

Together, we work to push the boundaries of modern manufacturing.

12. FINAL CTA (VERY IMPORTANT)

Heading:

Let's Build the Future Together

Subtext:

Partner with Nanya CNC and take your manufacturing capabilities to the next level.

CTA BUTTONS:

- **Get Free Consultation**
 - **Contact Us**
-

FINAL BRAND LINE

 **“Nanya CNC — Powering the Future of Smart Manufacturing.”**

1. INDUSTRIES MAIN PAGE

Heading:

Intelligent CNC Solutions for Every Industry

Subtext:

From automotive to aerospace, Nanya CNC delivers precision-driven, AI-powered manufacturing solutions tailored to the unique demands of every industry.

CTA:

- Explore Industries
- Get Consultation

 INDUSTRIES GRID (MAIN SECTION)

 Layout: 2-column or 3-column cards

 AUTOMOTIVE INDUSTRY

High-precision CNC machining for mass production of reliable automotive components.

Machines:

- 3-Axis Vertical Machining Centers
- CNC Lathes

 CTA: **Explore Industry**

 AEROSPACE & DEFENSE

Exceptional precision machining for flight-critical and structural components.

Machines:

- 5-Axis CNC Mills
- Vertical & Horizontal Machining Centers

 **CTA: Explore Industry**

MEDICAL & HEALTHCARE

High-precision solutions for surgical tools, implants, and diagnostic equipment.

Machines:

- Vertical Machining Centers
- Swiss-Type CNC Lathes

 **CTA: Explore Industry**

MOLD, DIE & ENGINEERING

Ideal solutions for mold making, die casting, and general engineering applications.

Machines:

- 3-Axis Machining Centers
- Surface Grinders

 **CTA: Explore Industry**

ELECTRONICS & SEMICONDUCTORS

Precision CNC machining for miniature components, enclosures, and heat sinks.

Machines:

- High-Speed Machining Centers
- Robotic Integration Systems

 **CTA: Explore Industry**

ROBOTICS & SMART MANUFACTURING

AI-driven systems and smart automation for next-generation production environments.

Machines:

- Robotic Systems
- CNC Controllers & Spare Parts

👉 CTA: **Explore Industry**

 CTA SECTION

Heading:

Not Sure Which Solution Fits Your Industry?

Subtext:

Our experts will guide you to the perfect CNC system tailored to your production needs.

👉 Button: **Get Free Consultation**

2. INDUSTRY DETAIL PAGE STRUCTURE (SAME FOR ALL)

Each industry will have its own page like:

👉 /industries/automotive

👉 /industries/aerospace

👉 etc.

AUTOMOTIVE INDUSTRY PAGE (FULL CONTENT)

Heading:

Precision CNC Solutions for the Automotive Industry

Subtext:

Delivering high-speed, high-accuracy machining for automotive components at scale.

Heading:

Driving Efficiency in Automotive Manufacturing

Content:

Nanya CNC provides advanced machining solutions designed to meet the demanding requirements of automotive production. From engine components to structural parts, our machines ensure precision, durability, and consistency at every stage.

- Engine Components
 - Transmission Parts
 - Brake Systems
 - Structural Frames
-

- 3-Axis Vertical Machining Centers
- CNC Lathes

 CTA: View Machines

BENEFITS

- High-speed mass production
- Consistent precision
- Reduced operational cost
- Automation-ready systems

CTA

 “Optimize Your Automotive Production with AI-Driven CNC”
Button: Get Consultation

AEROSPACE PAGE (SHORT VERSION STRUCTURE)

Heading:

Ultra-Precision CNC for Aerospace & Defense

Key Points:

- Flight-critical accuracy
- Complex geometries
- High-performance materials

Machines:

- 5-Axis CNC Mills
 - Vertical & Horizontal Centers
-

MEDICAL PAGE

Heading:

Precision Engineering for Medical & Healthcare

Focus:

- Implants
- Surgical tools
- Micro components

Machines:

- Swiss CNC
 - High-precision machining centers
-

MOLD & ENGINEERING PAGE

Heading:

Reliable CNC Solutions for Mold & Die Manufacturing

Focus:

- Mold making
 - Die casting
 - Engineering parts
-

ELECTRONICS PAGE

Heading:

High-Speed CNC for Electronics & Semiconductor Industry

Focus:

- Miniature components
 - Heat sinks
 - Device enclosures
-

ROBOTICS PAGE

Heading:

Smart CNC Systems for Robotics & Automation

Focus:

- AI integration
 - Smart production
 - Automation systems
-

3. IMPORTANT (DON'T MISS THIS)

Add Dynamic Filtering

When user clicks an industry:

Machines page auto-filters

Example:

User clicks Automotive → Machines page shows only automotive machines

SEO Advantage

Each industry page targets keywords like:

- CNC for automotive
- CNC for aerospace
- CNC for medical

This brings organic traffic

FINAL STRUCTURE

Industries Page (overview)

Individual Industry Pages
↓
Filtered Machines
↓
Quote / Lead

PRO TIP (AGENCY LEVEL)

This structure turns your site into:

 **Lead Generation Machine**

Not just a brochure.

1. PRODUCTS PAGE — FUTURISTIC STRUCTURE

PAGE FLOW

Hero (AI Positioning)
↓
Smart Filter System
↓
Interactive Product Grid
↓
Comparison / Smart Tools
↓
CTA Section

2. HERO SECTION (TOP OF PRODUCTS PAGE)

Heading:

Explore AI-Optimized CNC Machines

Subtext:

Find the perfect machine using smart filters, real-time comparisons, and intelligent recommendations.

○ Add:

- Search bar (center)
 - Quick category buttons:
 - Routers
 - Laser
 - Plasma
 - Custom
-

3. SMART FILTER SYSTEM (THIS IS KEY)

Instead of boring sidebar → make it feel like a **tech dashboard**

 Layout:

Top horizontal + optional side panel

FOR EXAMPLE YOU SHOULD DO ACCORDINGLY Filters to include:

◆ Category

- CNC Router
- Laser
- Plasma

◆ Industry

- Automotive
- Furniture
- Metal

◆ Material

- Wood
- Metal

- Acrylic

◆ Machine Size

◆ Budget Range

⚡ FUTURISTIC TOUCH:

- Toggle switches (not checkboxes)
- Animated sliders (for price)
- Smooth transitions (no reload)

👉 Feels like Tesla dashboard, not Excel form

■ 4. PRODUCT LISTING (MAIN GRID — VERY IMPORTANT)

✗ OLD STYLE:

- Image
 - Name
 - Read more
-

☒ FUTURISTIC PRODUCT CARDS

Each product card becomes **interactive**

⚙️ PRODUCT CARD DESIGN

Default View:

- Machine image (clean, high contrast)
- Name
- 2–3 key specs

- Tag:
👉 “AI Optimized” / “High Speed” / “Industrial Grade”
-

🔥 HOVER EFFECT (VERY IMPORTANT)

On hover:

- Card lifts (3D effect)
- Glow border (orange neon)
- Overlay appears:

👉 Shows:

- Speed
 - Precision
 - Use case
-

🎯 ACTION BUTTONS (ON CARD)

- View Details
 - Compare
 - Quick Quote
-

⚡ MICRO INTERACTION:

- Button hover → glow
 - Card tilt effect (slight)
 - Smooth animation (0.3s–0.5s)
-

■ 5. PRODUCT DETAIL PAGE (MAKE IT PREMIUM)

This is where conversion happens.

TOP SECTION

Layout:

LEFT → Image / Video

RIGHT → Info

RIGHT SIDE:

- Product name
 - Short description
 - Key specs (highlighted)
 - CTA:
 - Get Quote
 - Download Brochure
-

ADD THIS (FUTURISTIC FEEL)

“Performance Meter”

Visual bars:

- Speed
- Precision
- Efficiency

 Looks like a tech dashboard

TABS SECTION

Instead of long page → use tabs:

- Specifications
 - Features
 - Applications
 - Case Studies
-

 ADD “SMART INSIGHT”

👉 Small AI box:
“Best for: Automotive + Metal Fabrication”

 RELATED PRODUCTS

Horizontal scroll (smooth)

6. FUTURISTIC FEATURES (HIGH-END)

 A. COMPARE TOOL

User clicks “Compare”

👉 Opens comparison panel:

Feature Machine A Machine B

 B. QUICK QUOTE POPUP

Click → small modal:

- Name
 - Requirement
 - Machine auto-filled
-

 C. SMART RECOMMENDATION

Based on filter:

👉 “Recommended for you”

7. VISUAL DESIGN SYSTEM (THIS CREATES FUTURISTIC FEEL)

Colors:

- Background: Deep black (#0A0A0A)
 - Accent: Neon orange (your brand)
 - Highlights: Soft glow
-

UI STYLE:

- Glassmorphism cards
 - Thin borders + glow
 - Rounded corners (modern)
-

TYPOGRAPHY:

- Bold headings (tech feel)
 - Clean body text
-

8. ANIMATION SYSTEM (VERY IMPORTANT)

Add these:

☒ Scroll animations

Cards fade + slide

☒ Hover animations

Lift + glow

☒ Loading effect

Skeleton shimmer (premium feel)

9. USER EXPERIENCE FLOW

User enters →
Search / Filter →
Sees interactive cards →
Clicks product →
Views smart detail →
Requests quote

10. WHAT MAKES IT FEEL FUTURISTIC (REAL SECRET)

Not design alone.

👉 It's:

- Interaction
 - Motion
 - Smart filtering
 - Data visualization
-

WHAT TO AVOID

- Static grids
 - Long boring specs
 - No animations
 - No comparison
-

WHAT YOU MUST HAVE

- Interactive cards
- Smart filters

- Quick actions
 - Clean UI
-

👉 “Smart Product Experience System”

When user clicks:

🗨️ Opens a “Quote Builder Panel” (not normal form)

Think like:

👉 Amazon cart + Tesla configurator + industrial system UI

STEP 1: SELECT MACHINES

UI Type: Grid Selection Cards

Each machine appears as a selectable card:

Vertical Machine Center

- NANO-X8 ☐
- NANO-X10 ☐
- NV-855 ☐
- NV-1165 ☐
- NV-1370 ☐

Horizontal Machine Center

- HMC-630A ☐
- HMC-800A ☐

Slant-Bed Lathe

- 3015S ☐
- 3015M ☐
- 3015L ☐
- 3605S ☐

- 3605M ☐

Vertical Lathe

- VLT-550 ☐
- VLT-750 ☐

💡 Selected = glowing orange border + check animation

STEP 2: PROJECT DETAILS

User fills:

- Company Name
 - Industry Type (dropdown)
 - Country
 - Required Quantity
 - Budget Range (optional slider)
 - Timeline
-

STEP 3: ADD REQUIREMENTS

Checkbox options:

- Installation required
 - Training required
 - Spare parts package
 - Custom configuration
 - After-sales support
-

STEP 4: SUMMARY PANEL (RIGHT SIDE LIVE CART)

Like shopping cart:

Selected Machines:

- NV-1165 × 2
- HMC-800A × 1

Options:

- Installation ✓
- Training ✓

👉 “Estimated Quote Request Ready”

FINAL STEP: SUBMIT

Button:

👉 REQUEST ENGINEER QUOTE

Animation:

- Sends “data pulse effect”
 - Loading = “processing CNC system...”
-

RESULT FLOW (WHAT CLIENT FEELS)

Instead of:

✗ “Contact us form”

They feel:

✓ “I am configuring industrial machinery system”

DESIGN STYLE

- Dark UI dashboard

- Glass panels
 - Neon orange highlights
 - Subtle grid background
 - Smooth slide-in panels (like control systems)
 - Micro animations (hover = machine activation feel)
-

BONUS (HIGH IMPACT IDEA)

Add this under button:

“Engineers respond within 24–48 hours with technical quotation & drawings”

OR

“Custom machine packages available based on your production needs”

AFTER QUOTE SUBMISSION (WHAT USER SEES)

❖ 1. SUCCESS SCREEN (Instant Response)

Full-screen or modal dashboard style:

✓ SYSTEM CONFIRMATION

“Your Machine Configuration Has Been Received”

Subtext:

“Our engineering team is analyzing your selected CNC system.”

■ Animated Status Panel:

-  Sending data to engineering server...
-  Matching machine configurations...

-  Preparing technical quotation...
-  Assigning production consultant...

(Like a live system process — very futuristic)

4. QUOTE STATUS TRACKING PANEL

After submission, show a tracking card:

Quote Status

- Step 1: Received 
 - Step 2: Technical Review 
 - Step 3: Engineer Assignment 
 - Step 4: Quotation Preparation 
 - Step 5: Delivery 
-

5. LEAD CONFIRMATION SECTION

Client Info Summary:

- Name
- Company
- Country
- Contact

Button:

 **Download Summary PDF**

Button:

 **Talk to Engineer Now (WhatsApp / Call)**

6. SMART INDUSTRIAL MESSAGE (VERY IMPORTANT)

Show a trust message:

“Our engineering team will review your machine configuration and send a detailed technical quotation within 24–48 hours including pricing, specifications, and production recommendations.”

DESIGN STYLE

Make it feel like:

- CNC control panel UI
 - Dark industrial dashboard
 - Neon orange confirmation glow
 - Subtle scanning animation background
 - Glass cards for machine details
 - Expandable accordion specs
-

FINAL USER EXPERIENCE FLOW

1. User selects machines
2. Builds quote
3. Submits
4. Sees **“Engineering System Activated”** screen
5. Machines shown in structured dropdown
6. Status tracking appears
7. Feels like real industrial workflow, not a form

SHOW IN NAV BAR TO

☒ CONSULTATION PAGE (BEST FOR YOU)

This should feel like a **technical onboarding system**, not a form.

Think:

“We are not just contacted — we are consulted like engineers.”

STRUCTURE OF YOUR CONSULTATION PAGE

1. HERO SECTION

Title:

“Request CNC Machine Consultation”

Subtext:

“Tell us your production needs. Our engineers will design the right machine setup for your industry.”

Button:

 Start Consultation

2. CONSULTATION TYPE SELECTOR

User chooses intent:

-  New Factory Setup
-  Machine Upgrade
-  Production Expansion
-  Technical Guidance
-  Price Inquiry

 This helps filter serious leads

3. MACHINE INTEREST (VERY IMPORTANT)

Dropdown OR multi-select:

Vertical Machine Center

- NANO-X8
- NANO-X10
- NV-855
- NV-1165
- NV-1370

Horizontal Machine Center

- HMC-630A
- HMC-800A

Slant-Bed Lathe

- 3015S
- 3015M
- 3015L
- 3605S
- 3605M

Vertical Lathe

- VLT-550
- VLT-750

- ✓ Multi-select allowed
- ✓ Search bar included (important for 100+ products)

4. PROJECT DETAILS FORM

- Company Name
- Industry Type (dropdown: automotive, aerospace, metal, etc.)
- Country
- Required Production Capacity

- Budget Range (slider or dropdown)
 - Timeline (urgent / normal / planning phase)
-

5. REQUIREMENTS CHECKBOXES

- Installation required
 - Training required
 - Spare parts package
 - Custom machine configuration
 - After-sales support
 - CNC programming assistance
-

6. FILE UPLOAD (POWERFUL FEATURE)

Allow upload:

- Factory layout
- Technical drawings
- Existing machine photos

👉 This makes you look like a serious engineering company

7. SUBMIT BUTTON (FINAL CTA)

👉 **REQUEST ENGINEER CONSULTATION**

Animation:

- “Connecting to engineering system...”
 - “Analyzing production requirements...”
-

AFTER SUBMISSION SCREEN (VERY IMPORTANT)

Instead of simple thank you:

✓ “CONSULTATION REQUEST RECEIVED”

SYSTEM PANEL:

- Machines selected ✓
- Requirements logged ✓
- Engineer assigned ⌚
- Response time: 24–48 hours

Button:

👉 Track Request Status

Button:

👉 WhatsApp Engineer

Button:

👉 Download Summary PDF

WHY THIS IS BETTER THAN CONTACT PAGE

- ✓ Filters serious clients
- ✓ Increases deal value
- ✓ Feels like industrial engineering system
- ✓ Matches your CNC brand positioning
- ✓ Works perfectly for high-ticket machines

PRODUCT PAGE BUTTON SYSTEM

Each product card should have 3 layers:

 Primary Button:

 Get a Quote

 Secondary Button:

 Add to Quote List (like cart system)

 Tertiary Link:

 View Specifications
